

## Android Cooking eBook

Create an Android application to 'nicely' provide detailed cooking instructions and illustrations of at least 10 different plates. Let's pretend this project is part of an app's prototype for a company such as: Cooking Channel TV, the Food Network, etc.

### Design Specifications

The application exposes a list of dishes. Tapping a row provides (a) plate's ingredients and a detailed explanation on how to cook the dish, (b) a high-resolution image of the dish.

Each row consists of two parts. The left side contains a small icon (100x100) and the dish name. The right component facilitates displaying a high-resolution view of the dish.
